

B23 Energic

First Certified CS-23 Electric Trainer Aircraft

Aircraft Deliveries Starting in 2026
USA and Canada Deliveries in 2027

Performance

60 minutes of endurance, plus 10 minutes reserves ¹ (+/- 10 percents)

Standard pilot training mission: 6 flight circuits ²

Payload: 180 kg

Climb rate (at MTOP): 800 feet/min ³

Stall speed: 87 km/h - 47 Kts ⁴

Max cruise speed (at MCP): 200 km/h - 110Kts ³

Charging time: 1:1 ration use/charge time ⁵

Lower cost of ownership with electric propulsion

Dimensions

Equipment

Motor and energy data display

Flight display: dual Garmin G5, attitude, airspeed, altitude, side slip and magnetic heading incl. backup battery

Radio: Garmin GTR205

Transponder: Garmin

Angle of attack indicator: Garmin GI260

Flight controls on sticks

RPM, clock and voltage/current indicators

¹ at recommended take-off power

² based on traffic pattern illustrated in the graph

³ as tested in the current prototype

⁴ a marginal increase is expected due to the increased MTOW

⁵ depending on environmental conditions and charger performance

Electric Propulsion System

Battery pack
Power and protection distribution unit
Motor
Motor controller

Power management interface
Energy management interface
Power control

Technical Parameters

Single electric motor, MTOP 90 kW / 104 kW available ¹, MCP 80 kW, liquid cooled

48 kWh of usable energy

Rechargeable lithium batteries distributed in two redundant packs permanently installed

1500+ flight hours, depending on usage

Warning panel for vital battery and propulsion parameters

Charging Parameters

Input voltage: 3 phase 400V 50Hz
Input current: 32A or 63A ²

Output voltage: 800V

Possibility to use commercially available CCS-2 DC charger station satisfying above conditions

¹ Recommended for grass runway only

² Charging time depends on environmental conditions and charger performance

BRISTELL B23

About BRM

BRM is a Czech aircraft manufacturer created in 2009. With 5 models available, BRM produces more than 100 aircrafts yearly. BRM AERO's priority is its emphasis on innovation, continuously introducing new developments to its product line. With the B23 Energic, BRM positions itself as a pioneer of the next aviation revolution.

BRISTELL Energic

About H55

H55 is the leading enabler of electric aviation offering modular, lightweight and certified electric propulsion and battery management solutions to the aviation industry as to make air transport, quiet, clean and affordable. H55 supports its customers in integrating and customizing its technology solutions for a wide range of applications suitable for both existing airplane designs and future concepts such as VTOLs and e-commuter aircraft.
